The Annals of Mathematical Statistics
1970, Vol. 41, No. 6, xv–xxxv

CONTENTS OF VOLUME 41

ARTICLES AND NOTES

ABBEY, J. L. AND DAVID, H. T. The construction of uniformly minimum variance unbiased estimators for exponential distributions 1217–1222
ABRAHAMSE, ALLAN F. A comparison between the Martin boundary theory and the theory of likelihood ratios 1064–1067
AHLSWEDE, R. A note on the existence of the weak capacity for channels with arbitrarily varying channel probability functions and its relation to Shannon's zero error capacity 1027–1033
AHUJA, J. C. On a certain recurrence relation 665–666
AILAM, GEDALIA. The asymptotic distribution of the measure of random sets with application to the classical occupancy problem and suggestions for curve fitting 427–439
ALAM, KHURSHEED. Monotonicity properties of the multinomial distribution 315–317
ALAM, KHURSHEED. Monotonicity property of the distribution of the Studentized smallest chi-square 318–320
ALBERT, ARTHUR. Optimally timing the sale of stock when the tax man is breathing down your neck 626–641
ALBERT, A. E. AND GARDNER, L. A., JR. An addendum to "Stochastic approximation and non-linear regression" 646–647
ANDERSON, DONALD A. AND SRIVASTAVA, J. N. Some basic properties of multidimensional partially balanced designs 1438–1445
ANDERSON, GEORGE A. An asymptotic expansion for the non-central Wishart distribution 1700–1707
ATHREYA, KRISHNA B. A simple proof of a result of Kesten and Stigum on supercritical multitype Galton-Watson branching process 195–202
BANERJEE, K. S. Some observations on the White-Hultquist procedure for the construction of confounding plans for mixed factorial designs 1108–1113
BARANCHIK, A. J. A family of minimax estimators of the mean of a multivariate normal distribution 642–645
BAUM, LEONARD E., PETRIE, TED, SOULES, GEORGE AND WEISS, NORMAN. A maximization technique occurring in the statistical analysis of probabilistic functions of Markov chains 164–171
BELKIN, BARRY. A limit theorem for conditioned recurrent random walk attracted to a stable law 146–163
BERAN, R. J. Linear rank statistics under alternatives indexed by a vector parameter 1896–1905
BERK, ROBERT H. A remark on almost invariance 733–735

BERK, ROBERT H. Consistency a posteriori 894–906
BERK, ROBERT H. Stopping time of SPRTS based on exchangeable models 979–990
BERMAN, SIMEON M. Gaussian processes with stationary increments: local times and sample function properties 1260–1272
BHATTACHARYYA, B. B. Reverse submartingale and some functions of order statistics 2155–2157
BHATTACHARYYA, G. K. AND JOHNSON, RICHARD A. A layer rank test for ordered bivariate alternatives 1296–1310
BLOCK, H. W. Error estimation for a limit theorem for dependent random variables 1334–1338
BLYTH, COLIN R. On the inference and decision models of statistics ... 1034–1053
BOONYASOMBUT, VIROOL AND SHAPIRO, JESSE M. The accuracy of infinitely divisible approximations to sums of independent variables with application to stable laws 237–250
BOSWELL, M. T. AND PATIL, G. P. A characteristic property of the multivariate normal density function and some of its applications 1970–1977
BROCK, ARCHIE D. AND KRUTCHKOFF, RICHARD G. Distributions of Z^{γ} and Z^{*} for complex Z with results applied to the complex normal distribution 1563–1567
BROWN, B. M. Characteristic functions, moments, and the Central Limit Theorem 658–664
BROWN, B. M. AND EAGLESON, G. K. Behavior of moments of row sums of elementary systems 1853–1860
BROWN, B. M. AND HEYDE, C. C. On the departure from normality of a certain class of martingales 2161–2165
BROWN, MARK. An $M/G/\infty$ estimation problem 651–654
BROWN, MARK. A property of Poisson processes and its application to macroscopic equilibrium of particle systems 1935–1941
BROWN, MARK. Convergence in distribution of stochastic integrals .. 829–842
BYLEEN, KARL. On Stanton and Mullin's construction of Room squares 1122–1125
CAMPBELL, L. L. Equivalence of Gauss's principle and minimum discrimination information estimation of probabilities 1011–1015
CARNEY, E. J. Multiplication of polykays using ordered partitions ... 1749–1752
CHANG, TSENG C. On an asymptotic representation of the distribution of the characteristic roots of $\mathbf{S}_1\mathbf{S}_2^{-1}$ 440–445
CHANG, TSENG C., PILLAI, K. C. S. AND LI, HUNG C. Asymptotic expansions for distributions of the roots of two matrices from classical and complex Gaussian populations 1541–1556
CHAO, M. T. The asymptotic behavior of Bayes' estimators 601–608
CLARK, J. M. C. The representation of functionals of Brownian motion by stochastic integrals 1282–1295

COHEN, ARTHUR AND SACKROWITZ, HAROLD B. Estimation of the last mean of a monotone sequence 2021–2034
COHN, HARRY. On the tail σ-algebra of the finite inhomogeneous Markov chains 2175–2176
CONNER, WILLIAM M. The capacity and ambiguity of a transducer ... 2093–2104
COVER, THOMAS M. AND HELLMAN, MARTIN E. Learning with finite memory 765–782
CRAWFORD, GORDON B. Harmonic functions and hitting distributions for Markov processes 2123–2125
CUPPENS, R. AND LUKACS, E. On the domains of definition of analytic characteristic functions 1096–1101
DAVID, H. T. AND ABBEY, J. L. The construction of uniformly minimum variance unbiased estimators for exponential distributions 1217–1222
DAVIS, A. W. On the null distribution of the sum of the roots of a multivariate beta distribution 1557–1562
DE HAAN, LAURENS. A note on a paper by H. G. Tucker 729–732
DEHARDT, JOHN. A necessary condition for Glivenko-Cantelli convergence in E_n 2177–2178
DENNY, J. L. Cauchy's equation and sufficient statistics on arcwise connected spaces 401–411
DESHPANDÉ, JAYANT V. A class of multisample distribution-free tests. 227–236
DESU, M. MAHAMUNULU. A selection problem 1596–1603
DE WAAL, D. J. Distributions connected with a multivariate Beta statistic 1091–1095
DHARMADHIKARI, S. W. AND NADKARNI, M. G. Some regular and non-regular functions of finite Markov chains 207–213
DICKEY, JAMES M. AND LIENTZ, B. P. The weighted likelihood ratio, sharp hypotheses about chances, the order of a Markov chain ... 214–226
DRAPER, NORMAN R. AND MITCHELL, TOBY J. Construction of a set of 512-run designs of resolution $\geqq 5$ and a set of even 1024-run designs of resolution $\geqq 6$ 876–887
DUNCAN, TYRONE E. On the absolute continuity of measures 30–38
DYKSTRA, RICHARD L. A characterization of a conditional expectation with respect to a σ-lattice 698–701
DYKSTRA, RICHARD L. Establishing the positive definiteness of the sample covariance matrix 2153–2154
DYM, H. AND MCKEAN, H. P. Extrapolation and interpolation of stationary Gaussian processes 1817–1844
EAGLESON, G. K. AND BROWN, B. M. Behavior of moments of row sums of elementary systems 1853–1860
EATON, MORRIS, L. A complete class theorem for multidimensional one-sided alternatives 1884–1888
EATON, MORRIS, L. A note on symmetric Bernoulli random variables. 1223–1226

EATON, MORRIS L. Gauss-Markov estimation for multivariate linear models: A coordinate free approach 528–538
EATON, MORRIS L. AND MORRIS, CARL N. The application of invariance to unbiased estimation 1708–1716
EFRON, BRADLEY AND TAKEUCHI, KEI. Comments on Blyth's paper 1054–1058
EHRENFELD, S. On a scheduling problem in sequential analysis 1206–1216
EIKER, F. On the probability that a sample distribution function lies below a line segment 2075–2092
EISENBERG, BENNETT. Translating Gaussian processes 888–893
ELIAS, PETER. Bounds and asymptotes for the performance of multivariate quantizers 1249–1259
ENNS, E. G. The decision process for maximizing the probability of obtaining the random variable nearest to an arbitrary real number 1466–1471
ERICKSON, R. V. Functions of Markov chains 843–850
ERICSON, W. A. On a class of uniformly admissible estimators of a finite population total 1369–1372
FABIUS, J. AND VAN ZWET, W. R. Some remarks on the two-armed bandit 1906–1916
FEDERER, W. T. AND HEDAYAT, A. On the equivalence of Mann's group automorphism method of constructing an $O(n, n-1)$ set and Raktoe's collineation method of constructing a balanced set of L-restrictional prime-powered lattice designs 1530–1540
FEDERER, W. T. AND PAIK, U. B. A randomized procedure of saturated main effect fractional replicates 369–375
FEDERER, W. T. AND RAKTOE, B. L. A theorem on saturated plans and their complements 2184–2185
FEDERER, W. T. AND RAKTOE, B. L. Characterization of optimal saturated main effect plans of the 2^n factorial 203–206
FERGUSON, THOMAS S. On a class of infinite games related to Liar Dice 353–362
FERNANDEZ, PEDRO J. A weak convergence theorem for random sums of independent random variables 710–712
FIENBERG, STEPHEN E. An iterative procedure for estimation in contingency tables 907–917
FISK, P. R. A note on a characterization of the multivariate normal distribution 486–496
FOLKS, J. LEROY AND LITTELL, RAMON C. On the relation between Bahadur efficiency and power 2135–2136
FOX, MARTIN AND RUBIN, HERMAN. Functions of processes with Markovian states—III 472–479
FOX, RICHARD J. Estimating the empirical distribution function of a parameter sequence 1845–1852

GAFARIAN, A. V. AND MURTHY, V. K. Limiting distributions of some variations of the chi-square statistic 188–202
GÄNSSLER, PETER. Note on a result of Dudley on the speed of mean Glivenko-Cantelli convergence 1339–1343
GARDNER, L. A., JR. AND ALBERT, A. E. An addendum to "Stochastic approximation and non-linear regression" 646–647
GEERTSEMA, J. C. Sequential confidence intervals based on rank tests. 1016–1026
GESSAMAN, M. P. A consistent nonparametric multivariate density estimator based on statistically equivalent blocks 1344–1346
GETOOR, R. K. AND RAO, MURALI. Another look at Doob's theorem .. 503–506
GNANADESIKAN, R. AND WILK, M. B. Use of maximum likelihood for estimating error variance from a collection of analysis of variance mean squares 292–304
GRAYBILL, FRANKLIN A. AND KINGMAN, ALBERT. A non-linear characterization of the normal distribution 1889–1895
GUTHERY, SCOTT BATES. An inversion algorithm for one-dimensional F-expansions 1472–1490
GUTTMAN, IRWIN. Construction of β-content tolerance regions at confidence level γ for large samples from the k-variate normal distribution 376–400
HAQ, M. SAFIUL. Structural analysis for the first order autoregressive stochastic models 970–978
HARRIS, ROBERT. A multivariate definition for increasing hazard rate distribution functions 713–717
HARRIS, ROBERT. An application of extreme value theory to reliability theory 1456–1465
HARTIGAN, J. A. Exact confidence intervals in regression problems with independent symmetric errors 1992–1998
HEDAYAT, A. AND FEDERER, W. T. On the equivalence of Mann's group automorphism method of constructing an $O(n, n-1)$ set and Raktoe's collineation method of constructing a balanced set of L-restrictional prime-powered lattice designs 1530–1540
HEDAYAT, A. AND SEIDEN, E. F-square and orthogonal F-squares design: A generalization of Latin square and orthogonal Latin squares design 2035–2044
HELLMAN, MARTIN E. AND COVER, THOMAS M. Learning with finite memory 765–782
HELLMAN, OLAVI. On the effect of a search upon the probability distribution of a target whose motion is a diffusion process 1717–1724
HEYDE, C. C. Extension of a result of Seneta for the super-critical Galton-Watson process 739–742
HEYDE, C. C. AND BROWN, B. M. On the departure from normality of a certain class of martingales 2161–2166
HODGES, J. L., JR. AND LEHMANN, E. L. Deficiency 783–801

HOEFFDING, WASSILY AND SIMONS, GORDON. Unbiased coin tossing with a biased coin 341–352
HOEL, DAVID G. On the monotonicity of the OC of an SPRT 310–314
HORN, SUSAN AND SCHACH, SIEGFRIED. An extension of the Hewitt-Savage zero-one law 2130–2131
JAIN, NARESH C. AND KALLIANPUR, G. A note on uniform convergence of stochastic processes 1360–1362

SIEGMUND, DAVID AND ROBBINS, HERBERT. Boundary crossing probabilities for the Wiener process and sample sums 1410–1429
SILVERMAN, S. AND MINEKA, J. A local limit theorem and recurrence conditions for sums of independent non–lattice random variables 592–600
SIMONS, GORDON. A martingale decomposition theorem 1102–1104
SIMONS, GORDON AND HOEFFDING, WASSILY. Unbiased coin tossing with a biased coin 341–352
SINGER, BURTON. Some asymptotic results in a model of population growth 115–132
SOULES, GEORGE, BAUM, LEONARD E., PETRIE, TED WEISS, NORMAN. A maximization technique occurring in the statistical analysis of probabilistic functions of Markov chains 164–171
SREEHARI, M. AND PAKSHIRAJAN, R. P. The law of the iterated logarithm for a Markov process 945–955
SRIVASTAVA, J. N. AND ANDERSON, DONALD A. Some basic properties of multidimensional partially balanced designs 1438–1445
STEFANSKY, WILHELMINE. A necessary and sufficient condition that for regular multiple decision problems of type I every unbiased procedure has minimax risk 736–738
STONE, M. Necessary and sufficient condition for convergence in probability to invariant posterior distributions 1349–1353
STOUT, WILLIAM F. The Hartman–Wintner law of the iterated logarithm for martingales 2158–2160
SUCHESTON, LOUIS AND ORNSTEIN, DONALD. An operator theorem on L_1 convergence to zero, with applications to Markov kernels 1631–1639
SUGIYAMA, T. Joint distribution of the extreme roots of a covariance matrix 655–657
SWEAT, CALVIN W. Sequential search with discounted income, the discount a function of the cell searched 1446–1455
TAKEUCHI, KEI AND EFRON, BRADLEY. Comments on Blyth's paper ... 1054–1058
TANAKA, MASAO. Estimation and testing hypotheses for one, two, or several samples from general multivariate distributions 1999–2020
TARTER, MICHAEL AND KRONMAL, RICHARD. On multivariate density estimates based on orthogonal expansions 718–722
TAYLOR, HOWARD M. A Markov stopping problem for which no entry time is ϵ–optimal 2105–2112
TODOROVIC, P. On some problems involving random number of random variables 1059–1063
TRACY, D. S. AND NAGAMBAL, P. N. Products of two polykays when one has weight 5 1114–1121

TRUELOVE, ALAN J. Betting systems in favorable games 551–566
VAN EEDEN, CONSTANCE. Efficiency–robust estimation of location 172–181
VAN ZWET, W. R. AND FABIUS, J. Some remarks on the two–armed bandit 1906–1916
WAHBA, GRACE AND KIMELDORF, GEORGE S. A correspondence between Bayesian estimation on stochastic processes and smoothing by splines 495–502
WALK, HARRO. Convergence properties of martingale transforms 706–709
WALSH, JOHN B. Some remarks on the Feller property 1672–1683
WANI, J. K. AND KABE, D. G. Note on a characterization of the inverse Gaussian distribution 1071–1073
WEGMAN, EDWARD J. Maximum likelihood estimation of a unimodal density function 457–471
WEGMAN, EDWARD J. Maximum likelihood estimation of a unimodal density, II 2169–2174
WEISS, NORMAN, BAUM, LEONARD E., PETRIE, TED AND SOULES, GEORGE. A maximization technique occurring in the statistical analysis of probabilistic functions of Markov chains 164–171
WHITT, WARD. Weak convergence of probability measures on the function space $C[0, \infty)$ 939–944
WICHURA, MICHAEL J. On the construction of almost uniformly convergent random variables with given weakly convergent image laws 284–291
WIJSMAN, ROBERT A. Continuity of the Bayes risk 1083–1085
WILLIAMSON, JOHN A. Fluctuations when $E(|X_1|) = \infty$ 865–875
WILK, M. B. AND GNANADESIKAN, R. Use of maximum likelihood estimating error variance from a collection of analysis of variance mean squares 292–304
WOOD, RICHARD G. A note on random polynomials 680–682
WOODROOFE, MICHAEL. On choosing a Delta–sequence 1665–1671
WOODROOFE, MICHAEL. On the first time $|S_n| > cn^{1/2}$ 2179–2183
WOODWORTH, GEORGE G. Large deviations and Bahadur efficiency of linear rank statistics 251–283
WOODWORTH, GEORGE G. AND RIZVI, M. HASEEB. On selection procedures based on ranks: counterexamples concerning least favorable configurations 1942–1951
WYNN, HENRY P. The sequential generation of D–optimum experimental designs 1655–1664
YLVISAKER, DONALD AND SACKS, JEROME. Designs for regression problems with correlated errors, III 2057–2074
YOSHIKAWA, TSUNEO AND SAWARAGI, YOSHIKAZU. Discrete–time Markovian decision processes with incomplete state observation 78–86

ZACKS, S. Bayes and fiducial equivariant estimators of the common mean of two normal distributions 59–69
ZIDEK, James V. Sufficient conditions for the admissibility under squared error loss of formal Bayes estimators 446–456

CORRECTION NOTES

ARVESEN, JAMES N. Correction to "Jackknifing U-statistics" 1375
BELKIN, BARRY. Correction to "A limit theorem for conditional recurrent random walk attracted to a stable law" 1374
BREIMAN, LEO. Correction to "A delicate law of the iterated logarithm for non-decreasing stable processes 1126
DICKEY, JAMES AND LIENTZ, B. P. Correction to "The weighted likelihood ratio, sharp hypotheses about chances, the order of a Markov chain" 1374
GUPTA, S. DAS. Correction to "Optimum classification rules for classification into two multivariate normal populations" 326
HENRICHON, E. G. AND MOORE, D. S. Correction to "Uniform consistency of some estimates of a density function" 1126–1127
JENSEN, DONALD R. Correction to "The joint distribution of traces of Wishart matrices and some applications" 2186
HERZBERG, AGNES M. Correction to "Cylindrically rotatable designs of types 1, 2 and 3" 326–327
LIENTZ, B. P. AND DICKEY, JAMES. Correction to "The weighted likelihood ratio, sharp hypotheses about chances, the order of a Markov chain" 1374
MOORE, D. S. AND HENRICHON, E. G. Correction to "Uniform consistency of some estimates of a density function" 1126–1127
SETHURAMAN, J. Correction to "On the probability of large deviations of families of sample means 1376–1380

BOOK REVIEWS

DUPAČ, VÁCLAV. Review of "Stochastic Approximation" by M. T. Wasan 1131–1132
DYM, HARRY. Review of "Markov Processes and Potential Theory" by R. M. Blumenthal and R. K. Getoor 749–750
HEDAYAT, A. Review of "Patterns and Configurations in Finite Spaces" and "The Mathematics of Experimental Design" by S. Vajda 1780–1782
JAIN, NARESH C. Review of "A Graduate Course in Probability" by Howard Tucker 748–749
LEPAGE, RAOUL. Review of "A Course in Probability Theory" by Kai Lai Chung 746–748
NORMAN, M. FRANK. Review of "Random Processes and Learning" by M. Iosifescu and R. Theodorescu 1381–1383

ZACKS, S. Review of "Mathematics of Adaptive Control Processes" by Sidney J. Yakowitz 1128–1131
